**CENRO
ENFORCEMENT
OFFICER**

**KINAIYAHAN: A GIS-ENABLED WILDLIFE
RESCUE SPOT MAPPING SYSTEM IN
MANOLO FORTICH**

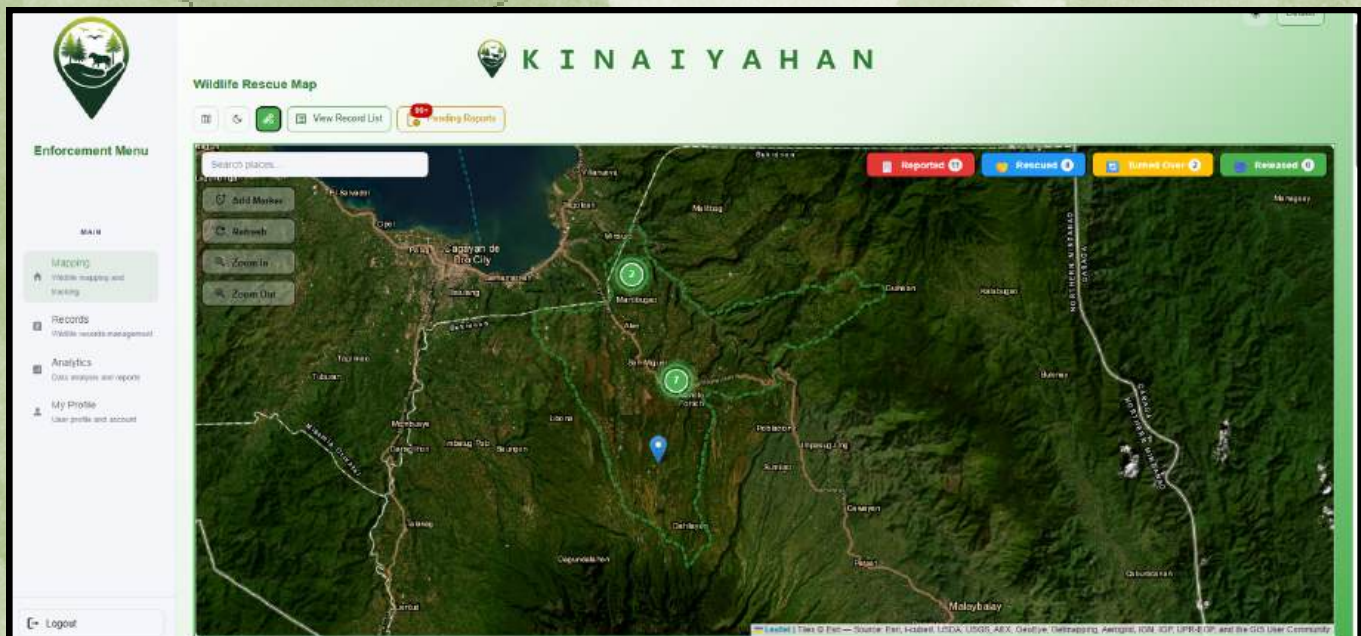

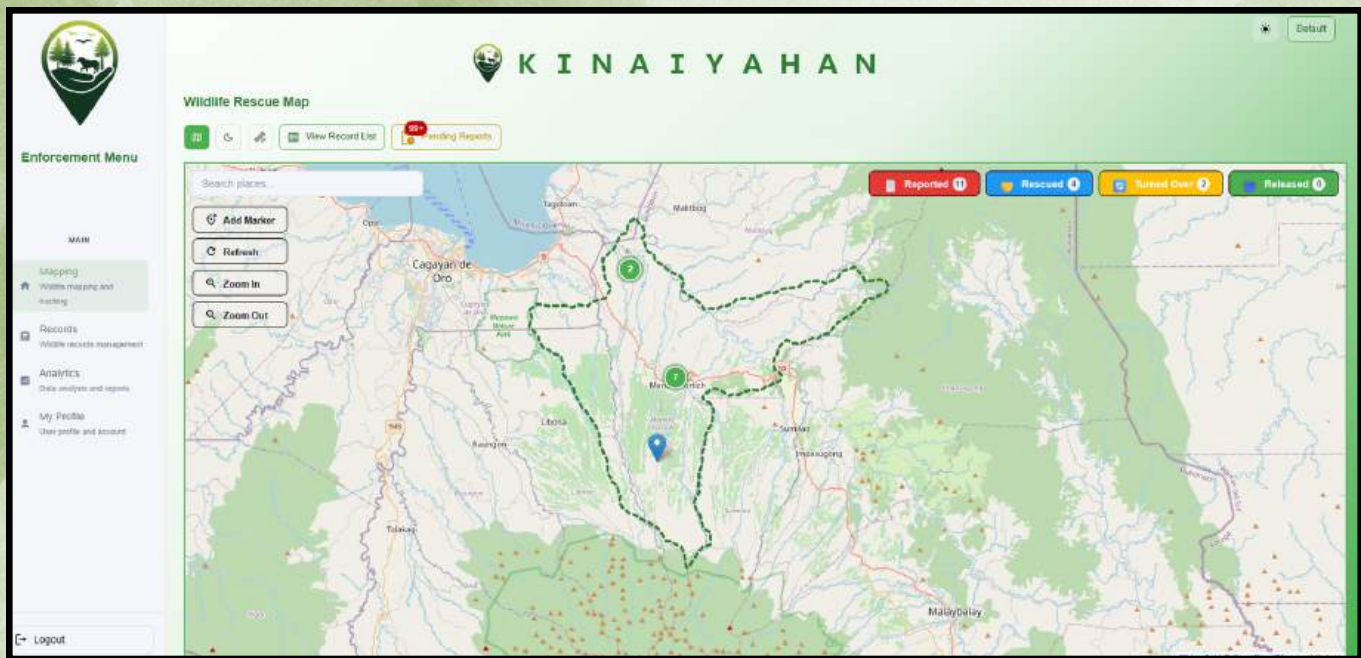

1. **Log-in page** - shows the log-in page where registered users can enter their credentials to access the system.

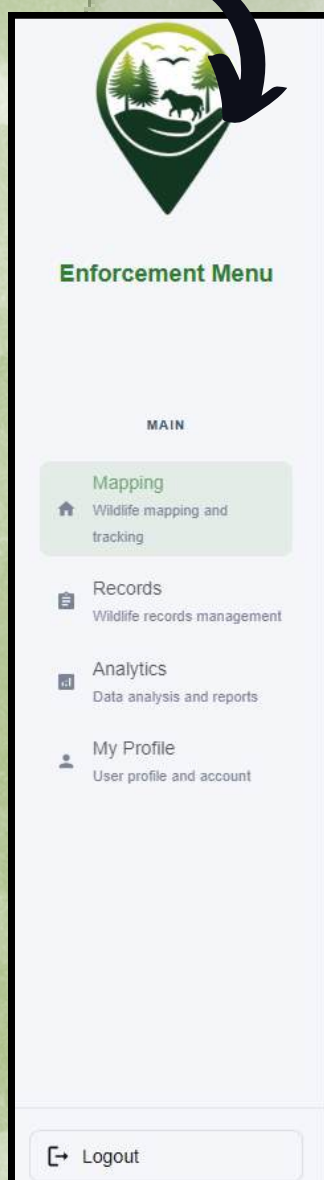

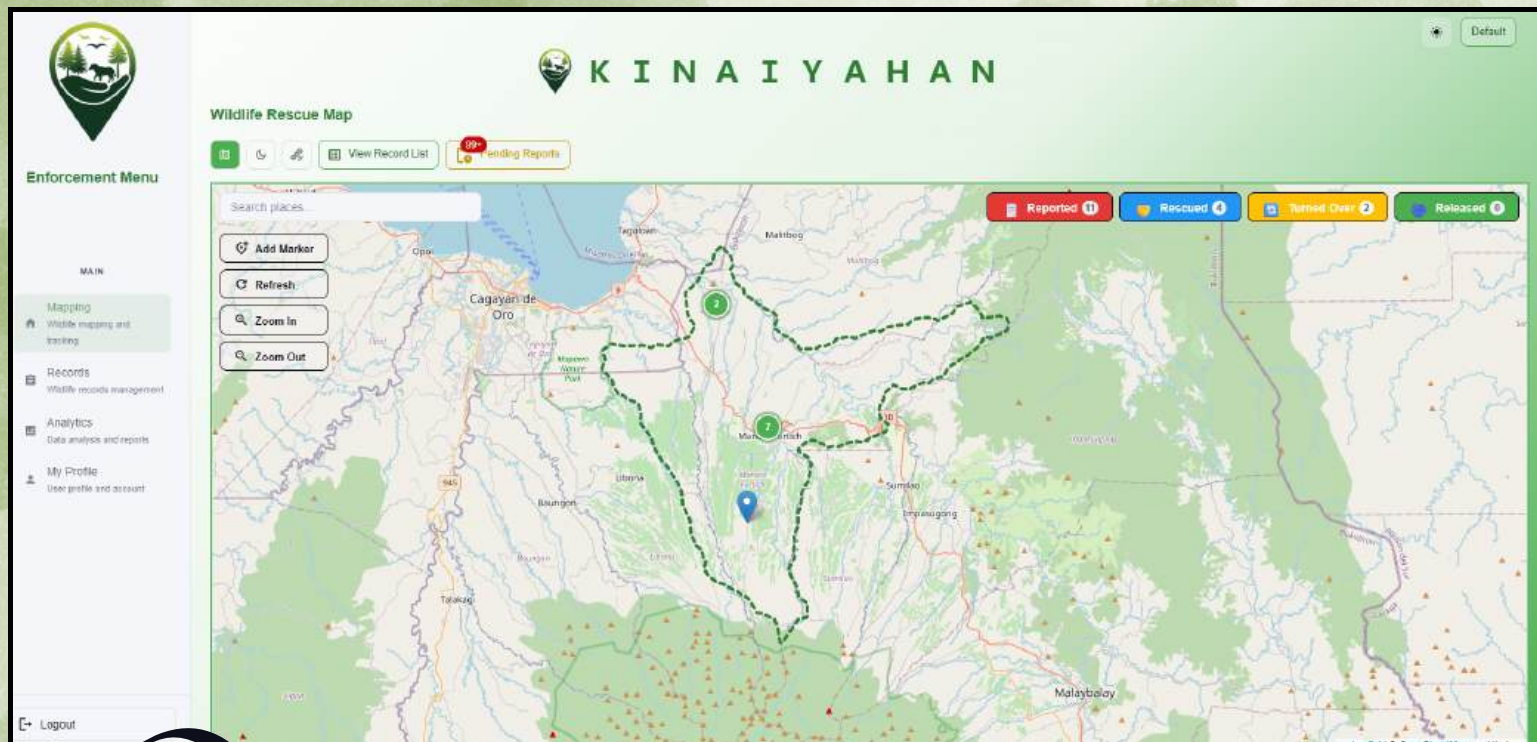

2. After pressing the 'Sign In' button, the Captcha Verification would appear. Where you have to accurately re-enter the code that was shown.

ENFORCEMENT DASHBOARD

3. Enforcement Dashboard Mapping Interface

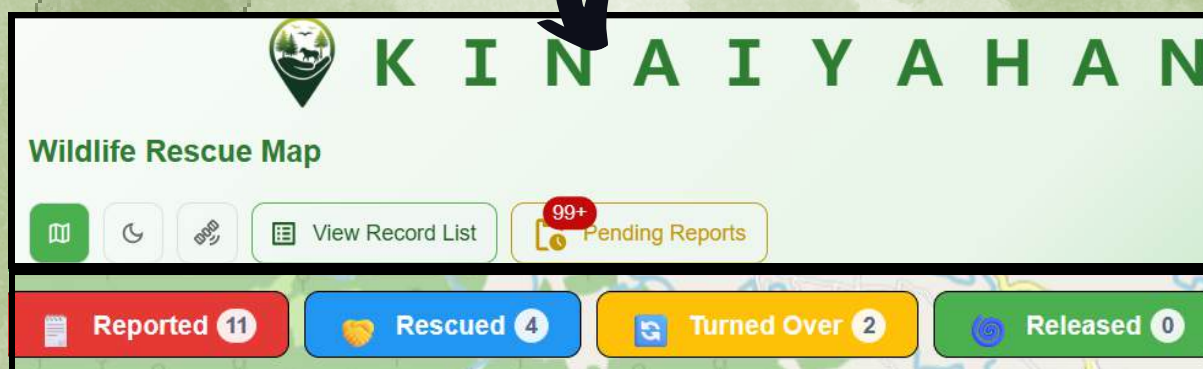

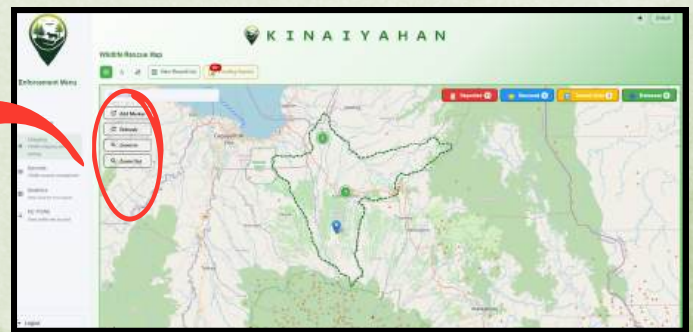

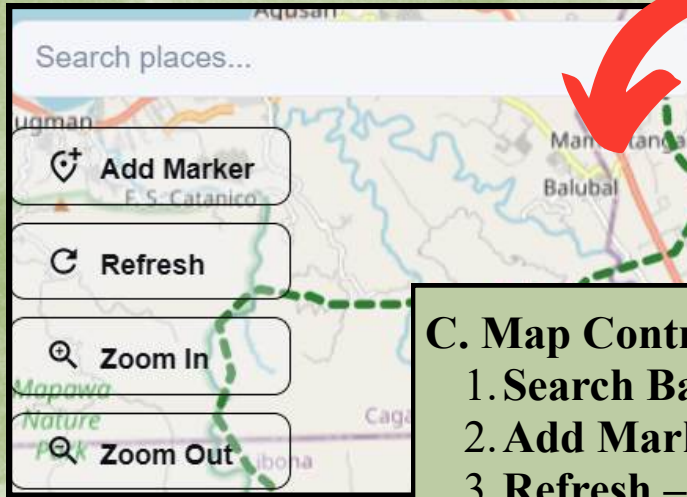

A. Sidebar Menu (Left Panel)

- **Mapping** – Wildlife mapping and tracking tools.
- **Records** – Access wildlife records and data management.
- **Analytics** – View charts, data summaries, and reports.
- **My Profile** – Manage your user profile and account settings.
- **Logout** – Securely exit the system.

B. Top Navigation Bar

- **System Logo & Title** – Displays the KINAIYAHAN branding.
- **View Record List Button** – Opens the list of stored wildlife reports.
- **Pending Reports Notification** – Shows the number of reports awaiting action.
- **Display Filters** – Options to filter report types (Reported, Rescued, Turned Over, Released).

C. Map Controls (Left of Map Panel)

1. **Search Bar** - To search places inside the map
2. **Add Marker** – Place a marker manually on the map.
3. **Refresh** – Reload the map and data.
4. **Zoom In / Zoom Out** – Change the map zoom level.

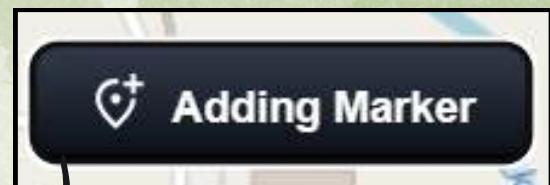

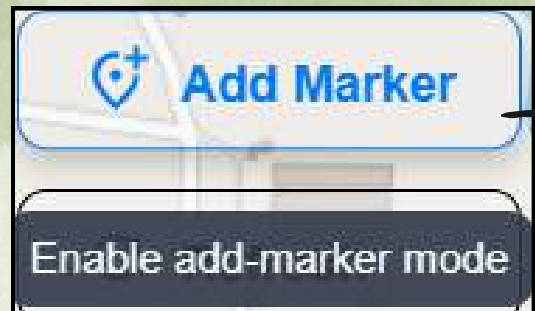

C-1. Search Bar

- Click the search bar located above the map.
- Type the name of a barangay, city, or specific spot.
- Press Enter to navigate.

C-2. Add Marker

- Click Add Marker.
- Click anywhere on the map to place the marker.
- A form will appear prompting you to enter wildlife details.

KINAIYAHAN

FREQUENTLY ASKED QUESTIONS (FAQ's)

**KINAIYAHAN: A GIS-ENABLED WILDLIFE
RESCUE SPOT MAPPING SYSTEM IN
MANOLO FORTICH**

1. What is Kinaiyahan?

- Kinaiyahan is a GIS-enabled mapping and monitoring system designed to record, locate, and track wildlife rescue incidents in Manolo Fortich, Bukidnon. It helps responders and partner agencies identify rescue spots faster and manage wildlife-related reports more efficiently.

(Ang Kinaiyahan usa ka GIS-enabled nga sistema sa pagmapa ug pagmonitor nga gidisenyo aron marekord, mahibal-an ang eksaktong lokasyon, ug masubay ang mga insidente sa pagluwas sa ihalas nga mga hayop sa Manolo Fortich, Bukidnon. Nakatabang kini sa mga responder ug kauban nga mga ahensya nga mas paspas mailhan ang mga lugar sa pagluwas ug mas episyente nga madumala ang mga report nga may kalabotan sa wildlife.)

2. Who can use the Kinaiyahan system?

- The system is intended for authorized users such as wildlife responders, LGU personnel, environmental officers, and partnered organizations involved in wildlife rescue and conservation. Some features may be restricted based on user roles. The community may be able to use the system to report sightings.

(Ang sistema gitumong alang sa mga awtorisadong tiggamit sama sa mga wildlife responder, kawani sa LGU, environmental officers, ug mga kauban nga organisasyon nga nalambigit sa pagluwas ug pagpanalipod sa wildlife. Ang ubang mga feature mahimong limitahan depende sa papel sa tiggamit. Ang komunidad mahimo usab nga makagamit sa sistema aron mo-report og mga nakita nga wildlife.)

3. How do I report a wildlife rescue incident?

- Users can submit a report by filling out the incident form by clicking the **REPORT SIGHTING** button found at the sign-in page and filling out the location on the form. Supporting details such as photos, species information, and reporter's information.

*(Ang mga tiggamit makahimo og pagsumite sa report pinaagi sa pagpuno sa incident form sa pag-klik sa **REPORT SIGHTING** nga buton nga makita sa sign-in page ug pagpuno sa lokasyon sa porma. Kinahanglan usab ilakip ang mga suportang detalye sama sa mga litrato, impormasyon sa species, ug impormasyon sa nag-report.)*

4. Do I need an internet connection to use Kinaiyahan?

- Yes. An internet connection is required to load maps, submit reports, and synchronize data in real time. Limited features may not work properly without connectivity.

(Oo. Gikinahanglan ang koneksyon sa internet aron ma-load ang mga mapa, makasumite og mga report, ug masinkronisa ang datos sa real time. Ang pipila ka mga feature mahimong dili molihok og tarong kung walay koneksyon.)

5. How accurate is the location mapping?

- Kinaiyahan uses GIS and map-based coordinates to pinpoint rescue locations. Accuracy depends on the data entered by the user and the device's location services, but the system is designed to provide reliable spatial information for decision-making.

(Ang Kinaiyahan naggamit og GIS ug mga koordinado nga nakabase sa mapa aron tukmang matino ang mga lokasyon sa pagluwas. Ang katukma nagdepende sa datos nga gisulod sa tiggamit ug sa location services sa device, apan ang sistema gidisenyo aron makahatag og kasaligan nga spatial nga impormasyon alang sa paghimog desisyon.)

6. Is the data stored in Kinaiyahan secure?

- Yes. The system implements user authentication and access controls to protect sensitive data. Only authorized users can view, add, or modify records.

(Oo. Ang sistema nagpatuman og user authentication ug access controls aron mapanalipdan ang sensitibo nga datos. Ang mga awtorisadong tiggamit ra ang makatan-aw, makadugang, o makausab sa mga rekord.)

7. Can I edit or update an existing report?

- Authorized users can update reports to reflect changes such as rescue status, animal condition, or transfer details. This ensures records remain accurate and up to date.

(Ang mga awtorisadong tiggamit makahimo sa pag-update sa mga report aron ipakita ang mga kausaban sama sa kahintangan sa pagluwas, kondisyon sa hayop, o mga detalye sa pagbalhin. Kini nagpasiguro nga ang mga rekord magpabiling tukma ug updated.)

8. What types of wildlife incidents can be recorded?

- Authorized users can update reports to reflect changes such as rescue status, animal condition, or transfer details. This ensures records remain accurate and up to date.

(Ang sistema mosuporta sa lain-laing mga klase sa insidente lakip ang mga nasamdan nga hayop, napahawa o napahimutang nga wildlife, mga report sa ilegal nga pagpanag-iya, ug mga nakita nga hayop nga nagkinahanglan og pagmonitor o interbensyon.)

9. What should I do if the system is not loading properly?

- Check your internet connection and refresh the page. If the issue persists, log out and log back in. For continuous problems, contact the system administrator or technical support.

(Susiha ang imong koneksyon sa internet ug i-refresh ang panid. Kung magpadayon ang problema, pag-log out ug pag-log in pag-usab. Kung magpadayon gihapon ang problema, kontaka ang system administrator o ang technical support.)

10. Can Kinaiyahan generate reports or summaries?

- Check your internet connection and refresh the page. If the issue persists, log out and log back in. For continuous problems, contact the system administrator or technical support.

(Yes. The system can generate summaries and visual reports based on recorded incidents, which can be used for monitoring trends, planning interventions, and supporting conservation efforts.)

11. Is training required before using the system?

- Basic training or orientation is recommended, especially for first-time users, to ensure proper data entry and effective use of the system's features.

(Girekomenda ang basic nga training o orientation, labi na sa mga unang higayon pa lang mogamit, aron masiguro ang husto nga pagsulod sa datos ug epektibo nga paggamit sa mga feature sa sistema.)

12. Can I use Kinaiyahan on a mobile device?

- Yes. Kinaiyahan can be accessed on mobile devices through a web browser. This is useful for field responders who need to report incidents or view locations while on-site. Note that only the **Report Sighting** feature is fully accessible and properly displayed on mobile devices. Other user role interfaces may encounter difficulties, as they have not yet been optimized for mobile use by the developers.

(Oo. Ang Kinaiyahan ma-access sa mga mobile device gamit ang web browser. Kini mapuslanon alang sa mga field responder nga kinahanglan mag-report sa mga insidente o motan-aw sa mga lokasyon samtang naa sa site. Hinuon, ang Report Sighting ra ang hingpit nga ma-access ug sakto ang pagpakita sa mobile devices. Ang uban nga interface sa laing user roles mahimong makasinati og kalisud, kay wala pa kini gi-optimize para sa mobile sa mga developer.)
